

A Selection of Business in the Community Ireland Members' Individual Carbon Commitments

| | |
|------------------------------|--|
| BAM Contractors | <ul style="list-style-type: none"> - BAM is to reduce relative CO2 emissions across the business by 15% (on 2009 figures) BAM Group: - Provide climate change information in corporate reports; - Responsible corporate engagement in climate policy. - We commit to achieving climate neutral operations by 2050 and working with our supply chain, customers and wider industry to deliver low carbon solutions for buildings and infrastructure, which deliver benefits for society as a whole. " |
| Coca-Cola HBC Ireland | <ul style="list-style-type: none"> - The Group commitment is 50% reduction in Carbon Emissions in manufacturing and fleet (Energy) and 30% reduction in Water from 2010 baseline, therefore enabling an overall 40% reduction as part of our 2020 vision for sustainable growth |
| Dawn Meats Group | <ul style="list-style-type: none"> - 50% reduction in carbon intensity and 40% reduction in energy and water intensity to 2020 (from a 2006 baseline). |
| Diageo Ireland | <ul style="list-style-type: none"> - We have also set 2020 targets to reduce our environmental impact. Reducing our carbon footprint and driving operational efficiencies remains a focus to deliver effective manufacturing and business activities in a low carbon future so our targets also address carbon, waste, packaging and deforestation to protect the natural resources that our businesses and communities rely on. We are developing the environmental capabilities and processes needed to ensure that Diageo's new products help us to meet our goals and aspirations. - We have a proud history of caring for the environment. Every year we produce more than 6.5 billion litres of our brands, from more than 100 manufacturing sites in 30 countries. To deliver our ambitions and remain resilient in a rapidly changing world, we are strengthening our environmental goals, and will continue to develop them as we grow. - As a business that uses water we take care to use this valuable natural resource responsibly, especially in areas where water is scarce. We will manage water responsibly by improving water efficiency, reducing water pollution; replenishing water in water stresses areas and encouraging more sustainable agriculture strategies. |
| IBM | <ul style="list-style-type: none"> - Procure electricity from renewable sources for 20 percent of IBM's annual electricity consumption by 2020. - Reduce CO2 emissions associated with IBM's energy consumption 35 percent by year-end 2020, against base year 2005, adjusted for acquisitions and divestitures. This represents an additional 20 percent reduction, from year-end 2012 to year-end 2020, over the reductions achieved from 2005 to 2012 under IBM's second generation goal. |
| Intel | <ul style="list-style-type: none"> - Further reduce direct greenhouse gas emissions 10% on a per unit basis from 2010 levels by 2020 while continuing to expand manufacturing capacity |
| Kellogg's | <ul style="list-style-type: none"> By 2020: - Expand use of low-carbon energy in our plants by 50% |

| | |
|-------------------------|---|
| | <ul style="list-style-type: none"> – Reduce energy and GHG emissions in our plants by an additional 15% (per metric tonne of food produced) from 2015 performance |
| KPMG | <ul style="list-style-type: none"> – Maintain carbon neutrality achieved in 2007 |
| Musgrave Group | <ul style="list-style-type: none"> – Through a combination of energy reduction and an increased use of renewables, Musgrave has reduced its total carbon footprint by 50% over the last 10 years against the background of an expanding business. We plan to reduce our carbon footprint by a further 10% over the next 3 years. |
| Ricoh Ireland | <ul style="list-style-type: none"> – By 2020 Ricoh Ireland will reduce carbon emissions by 30% and natural resource usage by 25%. – Furthermore, we aim to recycle 95% of the waste we generate by the end of this year—up from the already high 93% in 2014. All of this will help us achieve, and contribute to, Ricoh’s overall 2050 target: an 87.5% reduction in CO2 emissions. |
| Symantec | <ul style="list-style-type: none"> – Play our part in realizing the GHG emissions reductions that climate scientists tell us are needed in order to avoid the worst effects of climate change. We will set a science-based goal early in 2016 to guide our GHG emissions reduction efforts. – Continue to lend our voice to those calling for a meaningful clean energy policy framework, including through our participation in the Business for Innovative Climate and Energy Policy (BICEP) project. – Work with others, including our peers, customers, data center vendors and utilities, to leverage our collective knowledge and resources in addressing climate change. We will continue our collaboration with others in the technology sector to promote increased data center access to and use of renewable electricity through the BSR Future of Internet Power initiative. |
| Transdev Ireland | <ul style="list-style-type: none"> – Reduce overall greenhouse gas emissions through developing the use of sustainable transport and to reduce its own carbon footprint. |
| Veolia | <p>Veolia has made new commitments for 2030:</p> <ul style="list-style-type: none"> – to set an internal carbon price of 31€ per ton, for the economic considerations of our projects; – 100 million tons CO2 eq. emissions reduced by 2030; – 50 million tons CO2 eq. emissions avoided for the period from 2015 to 2020; – to capture more than 60 % of the methane produced by our waste storage centres. |
